

**POINTER  
WINDSOR  
30<sup>th</sup> June 2007**

I would like to thank all exhibitors who braved the wet weather. Due to the ground conditions I felt I had to forgive many for erratic movement. On a positive note I found no bad mouths and I thought that in bitches there was a greater depth of quality than dogs. However, I struggle with the apparent acceptance of high tail carriage which is becoming predominate in the breed. Once it is established it will become almost impossible to eradicate. The same applies to the untypical houndy heads which are also creeping into the breed. There were also some poor skin conditions that I feel might be attributed to diet. I was pleased to have given the breed two new champions, both well worthy of their title
